

STOCK-ade ST-400 Staple Gun

Engineered specifically for driving heavy-duty barbed fencing staples up to 50mm long, the ST-400 is suitable for all heavy duty wooden post and wire field fencing applications.

Featuring a staple guide for precise staple placement and adjustable depth of drive, the ST-400 tool will improve fencing speed and productivity.

STOCK-ade Staples

STOCK-ade staples are manufactured from heavy coat Bezinal[®] 2000 wire for extreme durability in the toughest rural conditions.

Available options include barbed, for superior holding power and wire security, and divergent pointed for hard timber.

Bendy Tool

The traditional and most economical way to join and repair wire, the Bendy Tool is compact and easy to use.

Felco C7 Wire Cutters

The tool of choice for professionals, these spring-loaded wire cutters can cut through all types of fencing wire and are easy to use with one hand. *Please contact Tornado for information on alternative wire cutters.*

STOCK-ade Compressor

The STOCK-ade petrol-driven air compressor is purpose-application built, portable and energy-efficient.

Wire Strainer

A trusted and versatile tensioning tool for use on plain, high tensile or barbed wire.

Boundary Strainer

Specifically designed for use with professional straining clamps and Tornado Pro-Clamps.

Pro Clamp

Tornado Pro-Clamps tension netting evenly with minimal risk of the clamp slipping. They are available in three lengths: 0.95m to suit stock fencing, 1.25m for horse fencing, and 2m to suit deer fencing. Pro-Clamps are available either left or right-handed, enabling them to be used as a pair.

Preformed Connectors

Available to suit 3.15mm (10g) or 2.5mm (12g) wire diameters, these connectors are used for joining wire together and are sold in bundles of 10.

Joining Sleeves

A cost-effective and permanent method of joining all types of fencing and wire netting, they are supplied in three sizes for high tensile and mild steel wire.

Delta Ring Pliers

Vastly increase the speed at which you fasten fencing to supporting wires.

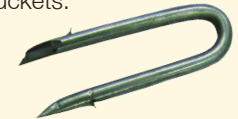

Ring Magazines

These clips suit Delta Ring Pliers and are supplied in boxes of 1000.

Staples

Available in plain or barbed, Tornado staples have been specially developed for use in softwood posts; the barb resists being pulled out even if the post dries out and splits. Both the plain and barbed options are supplied in 5, 10 or 20kg re-sealable plastic buckets.

Nails

Tornado offer an extensive range of galvanised nails in a variety of specifications. These are available in 25kg boxes.

Side Cutting Pliers

A versatile pair of pliers that employ a parallel action for ease of gripping, stripping and bending. The side cutters are capable of shearing up to 2.5mm high tensile or 6mm mild steel wire.

Ultracrimp 5 in 1 Tool

The EzePull 5 in 1 Fencing Tool is used for staple pulling, wire cutting, wire stripping, and joining of all wire sizes. It features jaws constructed from hardened cutlery grade stainless steel, lightweight and compact handles, comfortable rubber grips, and strong double action with over-centre lever for superior strength crimps.
